

COLORADO CPR ASSOCIATION

LIABILITY STATEMENT

The course for which you are enrolled may include physical strain, possibility for cross infection, and emotional stress. CPR is very strenuous both in practicing on the manikin and performing CPR on a cardiac arrest victim. If you have any medical conditions or cardiovascular disease history that may be aggravated by this course, please consult your physician as to whether you should participate in a CPR course. If you have any reservations about your ability to perform CPR on a cardiac arrest victim, you may want to reconsider taking this course. If you have recently had any infectious disease, including upper respiratory infection or open sores on your mouth and/or on hands, it is imperative to defer manikin practice.

****I have read all the above statements and absolve the American Heart Association and instructors from any liability associated herewith. I do not currently have any infectious disease.**

NOTE TO ALL INSTRUCTORS: The CPR Association is not responsible for misspelled typed cards due to illegible handwriting.
